

Crypto Security Checklist

Simple steps to help beginners protect their accounts and digital assets

Account Security

- Use a strong, unique password.
- Turn on two-factor authentication.
- Keep your email account secure.
- Review account activity and security alerts.

Wallet Security

- Understand the difference between a wallet address and private key.
- Never share your private key or seed phrase.
- Store recovery information somewhere secure.
- Be cautious when connecting a wallet to unfamiliar websites.

Scam Protection

- Do not trust guaranteed-profit promises.
- Be suspicious of urgent messages asking for crypto.
- Verify links and website addresses.
- Watch for fake support accounts and impersonators.
- Remember: sending crypto is often difficult or impossible to reverse.

Before Clicking or Signing

- Confirm what website you are using.
- Read transaction details before approving them.
- Avoid unknown attachments and suspicious links.
- Stop if something feels rushed or confusing.

Your Personal Rule

When in doubt, stop. Take time to verify the information before sending money, sharing information, or approving a transaction.
